ALL ROADS LEAD TO HEALTHCARE NETWORK
Healthcare Network is a medical and dental home, where everyone in the community can receive patient-centered, team-based and continuous comprehensive healthcare services regardless of their income or insurance status.

Since 1977, Healthcare Network’s private, not-for-profit model has proven effective at meeting Southwest Florida’s needs, and your philanthropic support is vital to ensuring we continue to achieve our vision of a community where every person has access to appropriate healthcare. We all benefit from a healthier community!

In 2018, Healthcare Network provided $10.3 million in uncompensated care. Notably, 43% of the adult patients seen did not have any form of insurance, and 57% of children were covered by Medicaid. Approximately 71% were living at or below the poverty level, and we provided care to 10,052 migrant workers or members of migrant families.
Additionally, we are creating a broad economic impact of $77 million and employing 377 people serving more than 51,000 patients at multiple locations, including the Ronald McDonald Care Mobile® and Health & Smiles Mobile.

How do we do it? With support from private philanthropic supporters who fill the gap between patient reimbursements, federal funding and grants. Even our employees step up to ensure that access to quality healthcare is available to all. Currently, employees contribute through auto payroll deductions to one or more of Healthcare Network’s funds. In fact, we raised $36,486 from employee deductions last year. Now that’s passion for what you do!

We hope you’ll support our mission with a donation that will help us continue to serve as an essential healthcare provider in Southwest Florida!

Dr. Emily Ptaszek

Healthcare Network

MISSION
To provide quality healthcare accessible to everyone in our community

VISION
We strive for a community where every person has access to appropriate healthcare
As Southwest Florida’s premier patient-centered medical and dental home, Healthcare Network impacted a record number of people in Southwest Florida in 2018. Our providers work as a care team to offer the highest level of coordinated care to everyone at every age. This team-based model ensures all providers are communicating, aligned and treating the whole person.

**HOW HEALTHCARE NETWORK MAKES AN IMPACT**

- **41,768** Dental Visits
- **51,348** Individual Patients Received Care
- **12,194** Behavioral Health Visits
- **215,058** Patient Visits
- **155,522** Medical Visits

**LIFESAVING PROACTIVE CARE BY THE NUMBERS**

- **814** Patients Received Diabetic Counseling
- **14,379** Pediatric Nutritional Counseling & Physical Activity
- **2,993** Patients with Controlled Hypertension
- **91%** Patients Adhere to HIV Medication
- **586** Medication Counseling & Reconciliation
- **69,413** Prescriptions Filled
TREATING THE WHOLE PERSON - BODY AND MIND

As a patient-centered medical home, Healthcare Network is a resource for prevention, wellness and quality healthcare. Committed to treating the whole person – in both mind and body – throughout the life cycle, our providers work collaboratively, across disciplines to meet the needs of the patients and communities we serve.

Our approach to complete health and well-being includes integrated behavioral health, where mental and emotional needs are addressed as part of primary care. The model is highly effective because patients often seek medical care for physical symptoms that are related to or caused by behavioral issues.

In addition to the integrated behavioral health for adults and children, we provide comprehensive adult primary care, pediatric care, women’s care and pharmacy services. We even provide dental health services for all ages - after all, it’s a key component of overall health.

**BEHAVIORAL HEALTH**
- 5,936 Patients Received Behavioral Health Services
- 7,739 Pediatric Behavioral Health Visits
- 4,455 Adult Behavioral Health Visits

**CHILDREN’S CARE**
- 14,262 Children Provided Immunizations
- 13,849 Back to School Physicals
- 30,081 Children Received Care
- 3.5 Newborns Delivered Per Day

**DENTAL CARE**
- 18,522 Dental Patients Served
- 41,768 Dental Visits
Our patient-centered approach accommodates each person’s unique needs – meeting them where they are on the road to better health and providing the care they need to reach their destination. Here are just a few stories that show how we touch patients’ lives and make a difference in our community!

**MARIA’S STORY**

At 32 weeks pregnant, Maria* was uninsured and concerned about her baby’s health. Fortunately, she learned Healthcare Network could help her. During the exam, Maria shared that she was experiencing distress after a traumatic event. She was introduced to one of our on-site psychologists for counseling. Today, Maria is a mom to a healthy beautiful baby girl and regularly attends therapy sessions.

**JOSHUA’S STORY**

When Joshua knocked out his two adult front teeth, Healthcare Network’s dental team worked quickly to slip and secure Joshua’s teeth back into place.

**DANIEL’S STORY**

“I don’t think I could have managed without Healthcare Network,” said Daniel, a patient with Type 1 Diabetes. “Through their Sliding Scale Program, they were able to help me get low-cost insulin and care, and I thank them from the bottom of my heart.”

**ALONDRA’S STORY**

“I was going through a difficult time,” said Alondra, a 12-year-old who suffered from anxiety-induced chest pains. “Dr. Whitt helped me put things into perspective and provided me with coping exercises that help me maintain a positive mindset when I am feeling stressed.” Remarkably, Alondra's experience inspired her to join Students’ Alliance on Mental Illness (SAMI), where she and other students work to connect peers in need with mental health providers.

*Patient name, image and identifying details have been changed to protect her privacy.*
In the greater Collier area, over one-third of residents are now 65 years of age or older. Because seniors are at risk for multiple diseases that might require overlapping treatments, their medical care can be complex. In fact, more than half of all older adults have three or more ongoing medical problems, such as diabetes, high blood pressure, heart disease and arthritis.

Dedicated and committed to serving this growing population, in 2012 Healthcare Network established our Senior Care program. Focused on keeping seniors independent and healthy, the program emphasizes prevention, treatment and optimal functioning as patients age. Supporting patients and their families with challenging conditions related to aging, our providers are highly trained at managing complex care needs, multiple medications, and numerous chronic conditions.

We employ a patient-centered collaborative care model that encompasses physical, cognitive, psychological, and social aspects of care and daily living to achieve the best outcome for each individual patient. Most importantly, our Senior Care program responds to what seniors need and want when it comes to their healthcare. This approach reduces costly and preventable hospitalizations and emergency department visits.

**SUSAN’S STORY**

Susan came to Healthcare Network in May 2018 after her primary care physician relocated out of state.

“It was important for me to find a physician who was skilled in senior and mental health care who would also be genuinely interested in my wellbeing,” said Susan. “I found this level of care through Healthcare Network. The professionalism, respect, and quality of services delivered by all the staff makes me feel truly blessed to have access to this care.”

**2,989 Seniors Cared for in 2018**
BREAKING BARRIERS TO HEALTHCARE

Healthcare Network’s Ronald McDonald Care Mobile® is a mobile pediatric office that, since 2004, has traveled to schools, community centers and neighborhoods to deliver dental and medical care to children in Collier County.

Services include:
- Dental screenings
- Sealants
- Fluoride
- School medical physicals
- Head Start screenings

Visiting 14 Title 1 schools (those with a high percentage of students from low income families), as well as select after-school programs and a variety of family-oriented festivals, the Ronald McDonald Care Mobile® is just one of the ways Healthcare Network is breaking barriers to healthcare in Collier County.

ASTRID’S STORY

Healthcare Network’s Ronald McDonald Care Mobile® literally brings smiles to underserved children by providing dental care to first and second grade students in 14 Collier County Title 1 elementary schools.

During a routine visit through the Care Mobile, the team met Astrid, an adorably sweet second grader. Astrid was not eating well, and her teacher was

AS A HEALTHCARE NETWORK PATIENT, ASTRID WOULD RECEIVE THE TREATMENT SHE NEEDED REGARDLESS OF HER INSURANCE STATUS.
concerned it might be because of her teeth. Her screening confirmed that Astrid had widespread tooth decay and infection. The Healthcare Network staff immediately contacted Astrid’s family to devise a care plan. Her family was deeply upset to learn Astrid’s teeth were in such grave condition. They did not have access to insurance through their employers and were concerned they could not afford her care. Healthcare Network assured Astrid’s parents that, as a Healthcare Network patient, Astrid would receive the treatment she needed regardless of their uninsured status.

The staff then helped her family sign up for our Sliding Fee Program and apply for support from one of the assistance funds. Due to Astrid’s advanced dental decay, her extensive treatment plan required 18+ visits that included antibiotics to eliminate infection, x-rays, removal of all her baby teeth, which were decayed, and restoring/filling select permanent teeth. Her family never missed an appointment and, throughout it all, Astrid remained very brave.

Today, Astrid is smiling brighter and out of discomfort thanks to regular check-ups and cleanings.

SUPPORTING KIDS ON THEIR HEALTHCARE JOURNEY

Imagine the miles Healthcare Network’s Ronald McDonald Care Mobile® has traveled since 2004. And, by donating, you can ensure it continues to support children on their healthcare journey.

A Gift of $300 - or $25 per month - can fully fund one child's treatment on Healthcare Network’s Ronald McDonald Care Mobile®

Give Just $25 Per Month!
As the single most underserved area in Collier County, the rapidly growing community of Golden Gate is in need of basic primary healthcare.

In April, Healthcare Network will expand its reach into this community by opening a new three-story, 50,000-square-foot building to help serve the 36,000 residents who live there.

The building has been named Nichols Community Health Center after a lead gift from Naples resident Jerry Nichols.

“I have focused my efforts and financial support on organizations that have an impact on children’s lives through education, access to healthcare and safe environments that help them grow and develop into their full potential,” Nichols said. “In Golden Gate, access to healthcare has been limited for so many. When children aren’t healthy, they’re not reaching their full potential, so I saw the Nichols Community Health Center as an opportunity to provide the people of Golden Gate access to better care, ensuring a better community for all.”

“A GOLDEN GATE OPPORTUNITY

“WHEN MORE PEOPLE HAVE ACCESS TO CARE, WE ALL BENEFIT FROM A HEALTHIER COMMUNITY.”

- Jerry Nichols, Philanthropist and Namesake of the Nichols Community Health Center
Healthcare Network broke ground on the Nichols Community Health Center in January 2019. Once complete, the new facility will offer an array of services for patients including obstetrics and gynecology, dental care, primary medical, and integrated behavioral health services, as well as a drive-thru pharmacy and walk-in clinic.

Located at 12655 Collier Blvd. in Naples, the $15 million medical center is on schedule to welcome patients in April 2020.

HELP BUILD A BETTER TOMORROW BY GIVING TODAY!

A $15 million investment in Collier County, the Nichols Community Health Center will make a world of difference for the residents of Golden Gate with new equipment, improved technologies and jobs for new staff members including doctors, nurses, medical personnel and more. While construction is currently underway, Healthcare Network still needs your support to meet the needs of this underserved community. You can help build a better tomorrow by giving today!

“Sometimes it’s difficult to travel from Golden Gate, where we don’t have a center of this nature. So it makes me very happy for the community.”
-Gloria, Golden Gate Resident
People of all ages and backgrounds need access to quality primary healthcare, and that is what Healthcare Network provides. We fill the gap by providing services to those without insurance or in need of financial assistance to pay out-of-pocket expenses.
